## B-Tree

## 

### Binary Search Tree

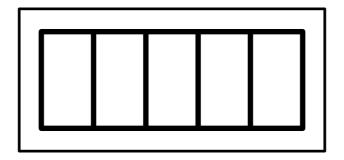

### B-Tree

- Что это?
- Зачем нужно?

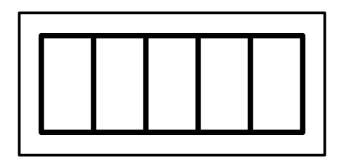

## Структура

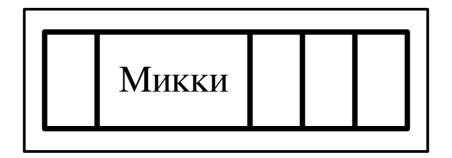

- Узел содержит набор ключей
- Ключи упорядочены
- d минимальное число ключей
- 2d максимальное число ключей
- d + 1 степень (минимальное количество детей)

#### BSON

(Binary JavaScript Object Notation)

- Аналог protobuf
- Эффективен в плане размера хранения
- Эффективен в плане сканирования
- Менее производителен, когда схема определена

#### BSON

(Binary JavaScript Object Notation)

- string
- int
- double
- DateTime
- byte[]
- bool
- null
- BsonObject
- BsonObject[]

#### BSON

(Binary JavaScript Object Notation)

```
{"hello": "world"}

\x16\x00\x00\x00 - документ 22 байта
\x02 - тип данных - string
hello\x00 - имя поля (cstring)
\x06\x00\x00\x00 - длина для типа string
world\x00
\x00 - конец документа
```
